Richard C. Dunn
Director

Bob Holden
Governor

TO: Missouri Local Public Health Agencies, Missouri U.S. Influenza Sentinel Surveillance Physicians, and Stakeholders

FROM: Libby A. Landrum, R.N., M.S.N., Influenza Coordinator
Section for Communicable Disease Prevention, Prevention and Care Programs

Eden Dietle, Health Program Representative II
Office of Surveillance

SUBJECT: Weekly Missouri Influenza Report, 2003-2004 Season
(All data in this report are provisional and may change as reports are updated.)

DATE: April 27, 2004

Missouri is reporting “no influenza activity” to the CDC for Week 16. (Influenza activity codes are reported to CDC each Monday.) To view weekly maps click [here](#).

Reported Laboratory-Confirmed Cases by Sub-type						
For the Week Ending April 24, 2004 (Week 16)						
Serogroups	A (non-typed)	A (H3N2)	A (H1N1)	B	A or B Untyped (rapid test)	Total
Week 16	0	0	0	0	3	3
Season-to-Date*	9,234	127	0	162	8,339	17,862

*The influenza season begins with week 40 (week ending October 4, 2003) and ends with week 20 (week ending May 15, 2004).

Clusters/Outbreaks of Influenza-like Illness								
For the Week Ending April 24, 2004 (Week 16)								
Health District	Central	Eastern	NW	SE	SW	Season -to- Date 03-04	Season -to - Date 02-03	Last Year Season Total 02-03
School Closings	0	0	0	0	0	16	205	205
Community Outbreaks	0	0	0	0	0	1	4	4
Long Term Care or Institutional Outbreaks	0	0	0	0	0	12	3	3
Other Outbreaks	0	0	0	0	0	0	0	0
Season-to-Date	13	1	7	3	5	29	212	212

The Missouri Department of Health and Senior Services protects and promotes quality of life and health for all Missourians by developing and implementing programs and systems that provide: information and education, effective regulation and oversight, quality services, and surveillance of diseases and conditions.

AN EQUAL OPPORTUNITY / AFFIRMATIVE ACTION EMPLOYER: Services provided on a nondiscriminatory basis.

Pneumonia and Influenza (P&I) Deaths			
For the Week Ending April 17, 2004 (Week 15)*			
Week 15	Season-to-Date	Week 15 Last Season	10 Year Weekly Median
90	3,008	31	44*

*Beginning in week 35 of 2003, the number of P&I deaths may show increases based on a new system of retrieval that now includes all contributing causes of death from death certificates.

* Prior to 1999, P&I data were collected from week 46 through week 17; therefore, the ten-year median will be noted only during those weeks.

U.S. Influenza Sentinel Physicians Surveillance Network (US ISPSN)						
Influenza-like Illness (ILI) for the Week Ending April 17, 2004 (Week 15)						
Age 0-4	Age 5-24	Age 25-64	Age 65+	Total ILI Patients Seen	Total Patients Seen	Percent ILI
2	3	1	0	6	2,998	0.20%*

* This percentage is below the national baseline of 2.5%.

Respiratory Specimens Submitted to SPHL for Viral Testing							
For the Week Ending April 24, 2004 (Week 16)							
	Positive Specimens						Total Number Specimens Submitted
	Influenza	Para-influenza	Respiratory Syncytial Virus (RSV)	Adeno-virus	Rhino-virus	Entero-virus	
Week 16	0	0	0	0	0	0	0
Season-to-Date	130	2	3	2	0	2	260

CDC antigenically characterizes a sample of positive Missouri influenza isolates, submitted through the Missouri Department of Health and Senior Services (DHSS), State Public Health Laboratory (SPHL). DHSS has received results on twenty-three influenza isolates submitted to CDC for antigenic characterization, of which:

One has a B/Sichuan/379/99-like antigenic profile. While this strain is different from the influenza B strain included in the 2003-04 influenza vaccine, it has enough similarities that the vaccine strain may help lessen the severity and duration of influenza illness.

Six have an A/Panama/2007/99-like (H3N2) antigenic profile and are antigenically similar to the A Panama/2007/99-like (H3N2) strain contained in the 2003-04 vaccine.

Thirteen have an A/Korea/770/2002-like (H3N2) antigenic profile, which is the reference strain for the A/Fujian/411/2002-like virus currently in circulation. The current vaccine offers some cross-protective immunity and reduces the severity of influenza illness.

Three are of the A/Fujian/411/2002-like (H3N2) genetic group, as determined by real-time PCR assay technology conducted directly on the viral material submitted. This virus has been recommended by the World Health Organization as the H3 component for the 2004-2005 Northern Hemisphere influenza vaccine.

Sources of Data: Laboratory-confirmed cases are reported to DHSS through the passive communicable disease surveillance system. Suspected influenza clusters and outbreaks are reported through the active surveillance system. Pneumonia and influenza deaths are reported through the DHSS Bureau of Vital Records. Influenza-like illness data by age category and total number of patient visits by week are reported voluntarily by participants in the U.S. Influenza Sentinel Physicians Surveillance Network.

This report may also be found on the DHSS Internet at: www.dhss.state.mo.us/Influenza/index.html. National influenza surveillance information is available from the Centers for Disease Control and Prevention at: www.cdc.gov/ncidod/diseases/flu/weekly.htm.

The Missouri Department of Health and Senior Services after hours number for reporting disease cases and emergencies is 1-800-392-0272.

Influenza: Weekly Serotypes

Influenza Season 2003-04, Missouri by County
Confirmed Influenza, Type A, B, or A/B Undifferentiated
Week 16, Ending April 24, 2004

A = Influenza A
B = Influenza B
U = Untyped
M = Missing

Influenza: Season Serotypes

Influenza Season 2003-04, Missouri by County
Confirmed Influenza, Type A, B, or A/B Undifferentiated
Season-to-Date, As of April 24, 2004

A = Influenza A
B = Influenza B
U = Untyped
M = Missing

Influenza: Weekly Count

Influenza Season 2003-04, Missouri by County
Confirmed Influenza, Number of Reported Cases, All Types,
Week 16, Ending April 24, 2004

Influenza: Season Rate

Influenza Season 2003-04, Missouri by County
Confirmed Influenza, Rate of Reported Cases, All Types,
Season-to-Date, As of April 24, 2004

NOTE: Class ranges may change from week to week to reflect the growth in rates statewide.

* Rates derived from Census 2000 population figures
